

Early Childhood Workforce Index 2016 NEW MEXICO

IN NEW MEXICO, there are 164,704 children age birth through five years; 58 percent of these children live in households where all available parents are currently working, and 33 percent of all New Mexico children are part of low-income families. It is widely agreed that the current early care and education system across states is woefully underfunded. The [cost of services](#) is out of reach for many working families, including those who earn middle-class wages. At the same time, large swaths of early childhood teachers — even those with college degrees — earn unlivable wages.

More than 4,890 members of the early childhood teaching workforce provide services to children in New Mexico.
