## CONNECTICUT

224,135  
Children age 0-5

15,860\*  
Members of the  
early childhood  
teaching workforce

**IN CONNECTICUT**, 74 percent of children live in households where all available parents are currently working, and 20 percent of all Connecticut children are part of low-income families. It is widely agreed that the current early care and education system across states is woefully underfunded. The [cost of services](#) is out of reach for many working families, including those who earn middle-class wages.

At the same time, large swaths of early childhood teachers — even those with college degrees — earn unlivable wages. More than 15,860 members of the early childhood teaching workforce provide services to children in Connecticut.

Occupation	Median wage
Child care worker	\$11.87
Preschool teacher	\$16.58
Center director	\$24.71
Kindergarten teacher	\$43.90
Elementary teacher	\$44.65
All workers	\$22.05

### Earnings by Occupation

- In 2017 the median wage for child care workers was \$11.87, **a 7% increase since 2015.**
- For preschool teachers the median wage was \$16.58, **a 6% increase since 2015.**
- For preschool or child care center directors, the median wage was \$24.71, **a 2% decrease since 2015.**

\*Total includes the following occupations as defined by the U.S. Bureau of Labor Statistics Occupational Employment Statistics (OES): "child care workers," "preschool teachers, excluding special education," "preschool teachers, special education," "education administrators: preschool/child care center programs". These data do not include the self-employed, although home-based child care assistants, who are employees, are likely included in the "child care worker" category. Due to the limited data available across states in the OES, state-based surveys or registries may provide more comprehensive estimates of the ECE workforce.
