

Early Childhood Workforce Index 2018 OREGON

283,014
Children age 0-5

14,550*
Members of the
early childhood
teaching workforce

IN OREGON, 62 percent of children live in households where all available parents are currently working, and 25 percent of all Oregon children are part of low-income families. It is widely agreed that the current early care and education system across states is woefully underfunded. The [cost of services](#) is out of reach for many working families, including those who earn middle-class wages.

At the same time, large swaths of early childhood teachers — even those with college degrees — earn unlivable wages. More than 14,550 members of the early childhood teaching workforce provide services to children in Oregon.

Occupation	Median wage
Child care worker	\$11.45
Preschool teacher	\$13.70
Center director	\$22.12
Kindergarten teacher	\$38.80
Elementary teacher	\$36.98
All workers	\$18.67

Earnings by Occupation

- In 2017 the median wage for child care workers was \$11.45, **a 4% increase since 2015.**
- For preschool teachers the median wage was \$13.70, **with no change since 2015.**
- For preschool or child care center directors, the median wage was \$22.12, **a 20% increase since 2015.**

*Total includes the following occupations as defined by the U.S. Bureau of Labor Statistics Occupational Employment Statistics (OES): "child care workers," "preschool teachers, excluding special education," "preschool teachers, special education," "education administrators: preschool/child care center programs". These data do not include the self-employed, although home-based child care assistants, who are employees, are likely included in the "child care worker" category. Due to the limited data available across states in the OES, state-based surveys or registries may provide more comprehensive estimates of the ECE workforce.
