

Early Childhood Workforce Index 2016 VERMONT

IN VERMONT, there are 36,607 children age birth through five years, and 21 percent of all Vermont children are part of low-income families. It is widely agreed that the current early care and education system across states is woefully underfunded. The [cost of services](#) is out of reach for many working families, including those who earn middle-class wages. At the same time, large swaths of early childhood teachers — even those with college degrees — earn unlivable wages.

More than 2,300 members of the early childhood teaching workforce provide services to children in Vermont.
