A Note From Ventura County Leaders

Early childhood is recognized as a critical period of human development, a time when the brain is rapidly forming the neural pathways that lay the foundation for lifelong learning, health, and well-being. Early childhood educators play a vital role in this process. These professionals are not simply caregivers; they are educators, brain builders, and child development experts who make it possible for children to thrive and for families to fully participate in the workforce. In many ways, the early care and education (ECE) workforce is the “workforce behind the workforce”—they serve as the backbone of the local economy, allowing all other sectors to function.

Meaningful change to the child care system is measured not only by the number of children served, but also by the wellness of the workforce. *State of the Early Care and Education Workforce: Ventura County* aims to shed light on the current conditions of Ventura County’s ECE workforce, from staffing levels to educator well-being, as this field continues to evolve with the changing landscape.

We hope that this profile serves as a reminder of the importance of child care and the well-being of those working in early childhood settings and as a call to action for policymakers, stakeholders, and community members to invest in and work toward solutions that uplift and sustain this critical profession.

About the Data

The data in these profiles were collected as part of the 2025 California Early Care and Education Workforce Study. The study was conducted by the Center for the Study of Child Care Employment (CSCCE) at the University of California, Berkeley. While most data were collected in spring 2025, a small number of sites were surveyed in early fall 2025. The surveys took place online in English, Spanish, Arabic, and Chinese. CSCCE invited all available licensed early care and education (ECE) programs serving children from birth to five in California, using contact information from Community Care Licensing and California State Preschool.

The survey received outreach support from local resource and referral agencies, professional associations, and the California ECE Workforce Registry. Data are weighted using a post-stratification method by program type and region. These adjustments allow us to align the study sample with the full population of sites locally. Unfortunately, our request for a list of small family child care (FCC) providers from Community Care Licensing is still under review. As a result, small FCC data at the regional and state level are not yet available. These missing estimates are marked with a hashtag.

In this snapshot, we compare county findings to the surrounding region and California as a whole. We group counties into five regions:

Northern Region		Bay Area	Central Region	Los Angeles	Southern Region
Alpine	Mono	Alameda*	Fresno*	Los Angeles*, **	Imperial
Amador	Nevada	Contra Costa*, **	Inyo		Orange
Butte*	Placer	Marin	Kern		Riverside*
Calaveras	Plumas	Napa*	Kings*		San Bernardino
Colusa	Shasta	San Francisco*	Madera*		San Diego*
Del Norte	Sierra	San Mateo**	Mariposa		Santa Barbara*
El Dorado*	Siskiyou	Santa Clara	Merced		Ventura*, **
Glenn	Sutter*	Santa Cruz	Monterey*		
Humboldt*	Tehama	Solano	Sacramento*		
Lake	Trinity	Sonoma**	San Benito		
Lassen	Tuolumne		San Joaquin		
Mendocino	Yolo		San Luis Obispo*		
Modoc	Yuba*		Stanislaus**		
			Tulare		

* Our [study website](#) includes a 2025 profile for this county.

** We released a detailed report using 2023 or 2024 for this county.

Key Terms

Early care and education (ECE): By “early care and education,” we mean licensed programs that serve children under six years of age (less than 72 months). While some children age four and older attend transitional kindergarten, a grade level in elementary school, this profile focuses on the two primary settings serving the full ECE age range: child care centers and family child care homes.

Center type: Title 22 centers follow the fundamental rules of health and safety associated with licensure. A smaller portion of centers participate in stricter standards governed by Head Start and/or Title 5, in which teachers work with a smaller group size and must complete more units in early childhood education coursework. State Preschool programs are subject to Title 5 rules and fall under this category in our snapshot.

Center teaching staff: This term covers a combination of lead and assistant teachers who work directly with children. Assistants (sometimes called “teacher aides” or “associate teachers”) work under the supervision of a lead teacher (sometimes referred to as a “head teacher” or “master teacher”).

Family child care (FCC) provider: FCC educators obtain a license to provide child care for a mixed-age group of children in their home. FCC homes may be owned or rented, but all sites must meet the strict requirements of state licensing.

FCC license type: An FCC provider can hold either a “small” or “large” license, a distinction that corresponds to the maximum group size (up to eight children for a small license and up to 14 for a large license). Most often, small FCC educators operate their child care program on their own, while large FCC educators work with at least one assistant.

Program Landscape

Early care and education operates in a mixed-delivery system, where families may enroll children at a child care center or family child care home. Many parents also rely on [family, friend, and neighbor caregivers](#), both as their primary strategy and in combination with licensed care. By the 2025-2026 school year, all four-year-olds will also have the option to enroll in [transitional kindergarten](#) at a public school. In this profile, we focused on the licensed settings (center- and home-based) serving children from birth through age five.

Table 1. Early Care and Education Sites

California, 2025

	Ventura County	Southern Region	California
Child care centers	199	2,756	10,254
Title 22 centers	125	1,692	6,150
Head Start/Title 5 centers	74	1,064	4,104
Family child care homes	594	8,689	28,659
Small license	340	4,885	14,983
Large license	254	3,804	13,676
All sites	793	11,445	38,913

Note: **Table 1** refers to specific sites, not licenses, as child care centers may hold multiple licenses. Centers licensed to serve school-age children only are excluded from the study. To determine the number of sites, CSCCE analyzed the list of child care licenses by address and agency name. Where possible, we added State Preschool sites that are operated by school districts AND exempt from licensure to “Head Start/Title 5.” However, there may be more district-run, exempt preschool programs we were not able to tally. Likewise, exempt programs operated by Tribes and military bases are not included in our study sample.

Demographics

Early educators in California are most often women of color, and many are also immigrants. Their backgrounds [mirror the children in their care](#), supporting culturally relevant early learning instruction.

Our survey of early educators included questions about personal characteristics. All data are self-reported. Respondents were allowed to decline to answer any of the questions, and we exclude those responses unless at least 5 percent of individuals selected it.

Table 4. Race and Ethnicity

California, 2025

	Ventura County	Southern Region	California
Family child care providers	(n=63)	(n=807)	(n=2,404)
Asian	2%	6%	13%
Black	3%	12%	12%
Latina*	70%	49%	44%
White	17%	16%	18%
Multiracial/Other	8%	17%	13%
Center teaching staff	(n=104)	(n=1,408)	(n=3,689)
Asian	4%	7%	11%
Black	1%	2%	4%
Latina*	55%	47%	46%
White	33%	27%	25%
Multiracial/Other	8%	16%	14%

* Because the early care and education workforce is overwhelmingly composed of individuals who identify as women, we use the gender-specific term “Latina” to describe members of the ECE workforce who identify as part of the Latin American diaspora. However, we know that data collection has not always accounted for gender diversity beyond a male/female binary. We gratefully acknowledge the contributions of early educators who identify as men, nonbinary, or another gender identity and recognize that the gendered oppression of women in the ECE workforce is related to the gender-based oppression of nonbinary, trans, and genderqueer educators.

Education and Experience

Early educators face different requirements for degrees, permits, and credentials, depending on the type of program where they work. To advance in the field—and to access better pay—educators often need a degree or at least coursework related to child development or early childhood education. However, many educators hold degrees [above and beyond requirements](#).

Table 9. Highest Level of Education

Pay and Well-Being

Caring for young children has a long [history](#) of being undervalued and underpaid. Lack of public funding to offset costs for parents also keeps compensation as low as possible: early care and education requires lower numbers of children per adult to support safe and quality care, and tuition-paying parents cannot afford the true cost of supporting living wages for early educators. Consequently, while [federal and state investments in ECE remain inadequate](#), the prevailing wages for early educators are still stubbornly low.

Table 11. Center-Based Educator Hourly Wages

California, 2025

	Ventura County	Southern Region	California
Title 22 centers			
Director-reported pay ranges	(n=26*)	(n=264)	(n=745)
Lead teacher	\$19.00-\$25.00	\$19.50-\$24.00	\$20.00-\$25.00
Assistant teacher	\$17.50-\$20.00	\$18.00-\$20.00	\$18.00-\$20.00
Title 22 centers			
Median self-reported wage	(n=23*)	(n=647)	(n=1,284)
Lead teacher	\$20.00	\$21.50	\$22.00
Assistant teacher	\$21.25	\$19.00	\$19.25
Head Start/Title 5 centers			
Director-reported pay ranges	(n=23*)	(n=89)	(n=369)
Lead teacher	\$23.91-\$29.61	\$23.00-\$31.36	\$23.00-\$31.00
Assistant teacher	\$18.81-\$25.00	\$18.79-\$24.00	\$18.20-\$23.00
Head Start/Title 5 centers			
Median self-reported wage	(n=56)	(n=556)	(n=1,827)
Lead teacher	\$25.00	\$26.82	\$27.00
Assistant teacher	\$23.00	\$20.00	\$23.56

Note: The “director-reported range” reflects the median lowest and highest wages being paid across sites. In contrast, the “self-reported” wage comes from the teachers and assistants who took our survey and reported their earnings directly.

Source: Center for the Study of Child Care Employment, University of California, Berkeley

Table 12. Family Child Care Annual Earnings

California, 2025

	Ventura County	Southern Region	California
Small license providers	(n=14*)	#	#
Estimated earnings range	\$12,000-\$31,400	#	#
Large license providers	(n=19*)	(n=309)	(n=1,044)
Estimated earnings range	\$60,000-\$84,000	\$59,000-\$70,000	\$52,000-\$65,000
All FCC providers	(n=33*)	(n=532)	(n=1,651)
Estimated earnings range	\$51,000-\$71,400	\$45,000-\$54,500	\$45,000-\$56,000

* Interpret with caution (fewer than 40 respondents).

We are unable to survey a representative sample of small FCC providers until our request for their contact information is fulfilled by Community Care Licensing

Note: Many FCC educators do not pay themselves a salary, so it can be challenging to calculate a wage (annual, hourly, or otherwise). As a result, we estimate a range in which their earnings fall based on a series of questions about their total household income and the proportion gained through working with children. Read more about our methodology in the appendix of our [2022 report](#) on ECE compensation.

Table 13. Economic Well-Being

California, 2025

	Ventura County	Southern Region	California
Family child care providers	(n=54-63)	(n=690-769)	(n=2,049-2,289)
Homeowner	58%	65%	64%
Enrolled in health insurance	92%	88%	90%
Any retirement savings	21%	24%	27%
Food sufficient*	61%	59%	60%
Enrolled in public assistance**	28%	44%	41%
Center teaching staff	(n=93-103)	(n=1,282-1,337)	(n=3,256-3,552)
Homeowner	36%	31%	30%
Enrolled in health insurance	92%	95%	94%
Any retirement savings	47%	44%	54%
Food sufficient*	59%	57%	57%
Enrolled in public assistance**	42%	35%	34%

* We use a question from the Current Population Survey [Food Security Supplement](#) about the food eaten in the household in the past 12 months and whether respondents were able to afford the food they needed. Educators who indicated they “had enough of the kinds of food [they] wanted to eat” are considered food sufficient. Other options included “enough but not always the kinds of food we wanted to eat,” “sometimes we did not have enough to eat,” and “often there was not enough to eat.”

** Public assistance programs include: Medi-Cal; CalFresh; Special Supplemental Nutrition Program for Women, Infants, and Children (WIC); subsidized housing; and food banks.

Source: Center for the Study of Child Care Employment, University of California, Berkeley

Table 14. Emotional Well-Being

California, 2025

	Ventura County	Southern Region	California
Family child care providers	(n=57-61)	(n=713-765)	(n=2,129-2,328)
High level of perceived stress*	53%	47%	53%
Significant depressive symptoms**	25%	21%	24%
Feel they make a difference***	83%	89%	88%
Center teaching staff	(n=98-104)	(n=1,298-1,372)	(n=3,454-3,702)
High level of perceived stress*	70%	65%	68%
Significant depressive symptoms**	41%	39%	40%
Feel they make a difference***	87%	82%	80%

* Reflects the proportion of respondents who scored six or more on the [Perceived Stress Scale \(PSS-4\)](#), the threshold for high levels of perceived stress

** Reflects the proportion of respondents who scored 10 or more on the [Center for Epidemiological Studies Depression Scale \(CES-D-10\)](#), the threshold for significant depressive symptoms.

*** Educators who replied they “very often” feel that their “work is making a difference with a child.” This question included a four-point scale: 1) never; 2) rarely; 3) sometimes; and 4) very often.
